Gemini's Topical Hallucinations

Prompt to Gemini

"The attached file contains events and contextual information on each line that begins with a timestamp or "Undated." Events have detailed narratives and contextual information is marked with "CNTX".

I need you to create a database of each event in the file, each event must have a timestamp, and the full narrative (as it appears in the attached file).

I need you to create and update a contextual/analytical framework and add each contextual item in the file to it.

There are 338 lines in the attached file."
